

# AccuWeld Gas Mixer

The Polaris Gas Mixer delivers an inert gas to keep your components dry plus helium for mass spectrometer leak checks. The Gas Mixer mixes a predetermined percentage of helium with inert gas in your atmosphere chamber. This helium is then sealed inside microelectronic, optoelectronic, TO, Semiconductor, Crystal, DIPs, and custom packages for quick and easy leak detection. Mixtures from 50%/50% to 90% nitrogen/10% helium may be obtained with a flow of up to 300 cubic feet per hour. Other gas mixes and gas percentages available also. Regulators ensure a constant and accurate flow.

- Adaptable to most atmosphere chambers
- Power: No power required
- Dimensions: 5.25" X 9.5" X 6.5"
- Weight: 3.5 lbs.
